

PROPRIETARY NAME AND DOSAGE FORM:**FULVIC ACID TABLETS (30)**

DISCLAIMER: This medicine has not been evaluated by SAHPRA for its quality, safety or intended use. This medicine is not intended to diagnose, treat, cure, or prevent any disease.

SCHEDULING STATUS: Unscheduled

COMPOSITION: Each tablet contains:

Ingredients	Elemental value	*NRV
Fulvic Acid (as CHD-FA™ Powder – Carbohydrate-derived)	300 mg	-
* South African Nutrient reference values for individuals 4 years and older - Not established		

Other Ingredients: Microcrystalline cellulose, magnesium stearate, silicon dioxide & coating.

PHARMACOLOGICAL CLASSIFICATION:

34.13 Category D (Health Supplement) [S0]

PHARMACOLOGICAL ACTION: Health supplement.

INDICATIONS: Indicated as a supplement where poor dietary intake of the listed active ingredients exist.

CONTRA-INDICATIONS:

- Hypersensitivity to any of the ingredients.

WARNINGS AND SPECIAL PRECAUTIONS:

- Large doses may give rise to gastrointestinal discomfort.

INTERACTIONS:

No known interactions with existing conditions at recommended dose. However, as a general precaution, it's advisable to consult a healthcare professional before combining Fulvic Acid with any specific medications, especially if they rely on precise absorption rates.

DOSAGE AND DIRECTIONS FOR USE:

The recommended usage is:

- Adults take 1 tablet daily with meals.

Do not exceed the recommended dose. This product should not be used as a substitute for a balanced diet.

SIDE EFFECTS AND SPECIAL PRECAUTIONS:

This supplement should be used with caution in individuals with the following medical conditions:

- Autoimmune diseases: Fulvic acid might increase the activity of the immune system. It might worsen some autoimmune diseases, such as multiple sclerosis, systemic lupus erythematosus (SLE) and rheumatoid arthritis (RA). People with these conditions should be cautious or avoid fulvic acid altogether.
- Kashin-Beck Disease: There is some concern that fulvic acid in drinking water might increase the risk of developing Kashin-Beck bone disease. It is thought that the risk is greatest in regions where people do not receive enough selenium in their diet.

KNOWN SYMPTOMS OF OVERDOSE AND PARTICULARS OF ITS TREATMENT:

In case of an accidental overdose, discontinue use and seek medical professional assistance immediately. Treatment is symptomatic and supportive.

Currently, there are no reported symptoms of overdose associated with Fulvic Acid when used as directed.

DOSIS EN GEBRUIKSAANWYSINGS:

Die aanbevolle gebruik is:

- Volwassenes neem daagliks 1 tablet saam met etes. Moenie die aanbevolle dosis oorskry nie. Die produk moenie 'n gebalanseerde dieet vervang nie.

MOONTLIKE NEWE-EFFEKTE EN SPESIALE VOORBERGING:

Hierdie aanvulling moet met versigtigheid gebruik word by individue met die volgende mediese toestande:

- Auto-immuunsiektes: Fulviesuur mag moontlik die aktiwiteit van die immuunselsel verhoog. Dit kan sommige auto-immuunsiektes, soos multiplieë sklerose, sistemiese lupus erythematosus (SLE), en rumatoïde artritis (RA), moontlik vererger. Mense met hierdie toestande moet versigtig wees of Fulviesuur heeltemal vermy.
- Kashin-Beck-siekte: Daar is 'n mate van kommer dat Fulviesuur in drinkwater die risiko van die ontwikkeling van Kashin-Beck-bot siekte mag verhoog. Daar word vermoed dat die risiko die grootste is in streke waar mense nie genoeg selenium in hul dieet ontvang nie.

**PROPRIETARY NAME AND DOSAGE FORM:
FULVIC ACID TABLETS (30)**

DISCLAIMER: This medicine has not been evaluated by SAPHRA. This medicine is not intended to diagnose, treat, cure, or prevent any disease.

Read all this leaflet carefully because it contains important information for you. This medicine is available without a doctor's prescription, for you to use as a vitamin supplement.

Nevertheless, you still need to use it carefully to get the best results from it.

- Keep this leaflet. You may need to read it again.
- Ask your pharmacist if you need more information or advice.
- You must go see a doctor if you experience worrying symptoms.

SCHEDULING STATUS: Unscheduled

CONTAINS: Each tablet contains:

Ingredients	Elemental value	*NRV
Fulvic Acid (as CHD-FA™ Powder – Carbohydrate-derived)	300 mg	-

* South African Nutrient reference values for individuals 4 years and older
- Not established

Other Ingredients: Microcrystalline cellulose, magnesium stearate, silicon dioxide & coating.

WHAT IS THIS SUPPLEMENT USED FOR:

Fulvic Acid is a versatile supplement known for its potential benefits, which may include:

- detoxification support,
- improved nutrient absorption,
- reduction of inflammation,
- enhanced energy and vitality,
- immune system support,
- and gut health promotion.

While it shows promise in various areas, it's essential to note that individual responses may vary. Always use supplements as part of a balanced and healthy lifestyle.

BEFORE YOU TAKE THIS SUPPLEMENT:

Do not take if you are allergic to any of the ingredients.

Take special care when taking any supplement:

- Do not exceed the daily recommended amount.
- Seek professional advice if suffering from any **allergies**.
- Seek professional advice if **any other medications** are being taken or another medical condition is present.
- If you are taking other supplements, read the label as these supplements may contain the same ingredients.
- If you are **pregnant or breast feeding** your baby, please consult your health care provider for advice before taking this medicine.
- This supplement should not impair or affect your ability to **drive or operate heavy machinery**.

TAKING/USING OTHER MEDICATION:

There are no known interactions at the recommended dosage for healthy individuals. See "PACKAGE INSERT Interactions."

HOW TO TAKE:

The recommended usage is:

- Adults take 1 tablet daily with meals.

IF YOU TAKE MORE THAN YOU SHOULD:

In the event of an overdose, consult your doctor or pharmacist immediately. If neither is available, contact that nearest hospital or medical centre. Treatment is symptomatic and supportive.

POSSIBLE SIDE EFFECTS:

These supplements are generally well-tolerated when taken as directed. Currently, there are no reported symptoms of overdose associated with Fulvic Acid when used as directed. However, as with any supplement, excessive intake could lead to gastrointestinal discomfort.

If you experience any unusual or severe side effects, discontinue use, and seek medical attention.
